Re: General Notice Letter and Information Request Pursuant to CERCLA Section 104(e), 42 U.S.C. §9604(e), Information Request for the Eagle Industries, Inc., Site in Midwest City, Oklahoma County, Oklahoma

Dear Sir/Madam:

The purpose of this letter is to notify you, Eagle Industries, of your potential liability at the Eagle Industries, Inc. Site (Site) located in Midwest City, Oklahoma County, Oklahoma. This letter also seeks your cooperation in providing information and documents relating to the contamination of the Site. Under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly known as the federal "Superfund" law, the EPA is responsible for responding to the release or threat of release of hazardous substances, pollutants or contaminants into the environment – that is, for stopping further contamination from occurring and for cleaning up or otherwise addressing any contamination that has already occurred. The EPA has documented that such a release has occurred at the Site. The EPA has spent, or is considering spending, public funds to investigate and control releases of hazardous substances or potential releases of hazardous substances at the Site. Based on information presently available to the EPA, the EPA has determined that you may be responsible under CERCLA for cleanup of the Site or costs the EPA has incurred in cleaning up the Site.

**Site Background**

The Eagle Industries Superfund Site is located at 10901 SE 29th Street, Midwest City, Oklahoma County, Oklahoma, and includes an aircraft oxygen and fire extinguisher repair and cleaning operation. Eagle Industries, Inc. was first incorporated in the State of Oklahoma in 1981. In 1989, a 4,560 square feet light industrial building was built on the property. Eagle Industries Inc. began operations on Site in 1990. Previous sampling investigations have indicated the presence of trichloroethylene (TCE), used as a solvent to clean airplane parts, in on-site soil and groundwater, and in an onsite residential well.
